

RR APPARELS

Knitted Fabrics | Knitted Garments | Woven Garments | Home Textile

MISSION STATEMENT

We aim to be one of the finest vertically integrated garment producers of Pakistan specializing in knitted, woven, and also home Textile products while providing the best possible service, value and quality to all our customers.

INTRODUCTION

RR Apparels is a family owned business. The current result and outcome of RR Apparels is because of the continuous effort of all brothers together forming one solid organization that is capable of facing any challenge.

RR Apparels specializes in manufacturing value added knitwear products used in world class promotional campaigns and also deals in corporate wears. Currently we are exporting to some of the worlds well known branded retailers. In addition, RR Apparels can also deliver quality woven garments and home textile products. In all, there is more than 35 years of working experience behind RR.

RR Apparels is responsible to complete the entire process of making the garment and deliver as per the requirement. Most of the production cycle of RR Apparels is carried out in-house. The manufacturing facility possesses state-of-the-art machines, skilled workforce, vast experienced technicians and staff. All this gives a smooth flow to production, which ends up giving finest quality products in time. RR Apparels is ready to move into the new era of style and fashion adopting the current techniques. We are WRAP and CTPAT certified. We have an in-house CCTV and ERP system in place.

OUR COMPANY AT A GLANCE

FABRICATION

Knitting

At RR Apparels (Pvt) Ltd. our newly renovated knitting department consists of a combination of 16 machines of Fukhuara and Ssang Yong that is capable of producing over 100,000kg of fabric per month. Fukhuara machines are considered to be one of the best in the world when it comes to quality, productivity, versatility and reliability. Our knitting department operates 24 hours and is well monitored and supervised at all time with highly skilled machine operators who have been with us since over 20 years.

Dyeing

Dyeing is subcontracted under our technical supervision but it has been carefully chosen so our quality is not compromised. The dyeing house which we use consists of modern plant & machinery. Soft Flow machines of Fong, high temperature machines of Theis, Heliot and Tubetex Dryers. The dyeing technician has been in the industry for well over 30 years and their knowledge and experience together with the rest of the team gives us good quality which is color matched, controlled shrinkage, Required GSM. Our dyeing capacity is 160,000 kg per month. RR Apparels is well inline with the current market trends.

APPAREL PRODUCTION

Cutting, Packing & Pressing

In Cutting, Packing & Pressing, the human resources that we use work on their duties very sincerely and they have been with the company for a long time. In cutting, dead cotton, holes, unevenness, dyeing faults, shade variation, needles marks from knitting get reported and are rectified in the first instance. Our pressing and packing department is well managed and is always inline with overall production cycle.

Embroidery Machines

Our embroidery department consists of four 20 heads and a 12 head Tajima Machines. Tajima Embroidery machines doesn't need any introduction at all. It is the world best Embroidery Machines and have high production speed as well. It also possesses self cutter from which there is no need to cut the thread after being embroidered. The embroidery production varies on different stitches of embroidery & designs.

Printing Machines

Our printing is managed by extremely technical people of the industry who are well aware of various perimeters in the different processes. The units possess different forms of printing machines from Octopus (Circular), heat transfers and table print. The complete plant has a production capacity of printing over 4,000 pieces in a day. We at RR Apparels aim to deliver crown quality printed garments in time.

Stitching Machines

Stitching is one of the most important factors in apparel production and where skilled people are required to work on quality machines to give required output. In our stitching department there are over 200 machines with the combination of Juki and Kansai Stitching machines. Our stitching unit maintains quality standards and can produce monthly around 200,000 plain T-shirts, 80,000 Rugby-Shirt, 120,000 Polo -Shirts, 140,000 Sweat-Shirts, 100,000 Pajama-Suits, and 30,000 fleece jackets. The people who work here have been with us since 1969.

Quality Control

Quality Control is the most essential aspect in production. There are multiple points for each of the stages of production where the fabric/garment gets checked in our unit. Highly skilled, trained and experienced staff is used in the checking departs as the defect should not pass from here even if moved from other stages of production. We have put great efforts in training and also educating our checking staff on regular basis to improve the quality of a single garment. RR Apparels is responsible to complete the entire process very smoothly in order to deliver to garments as per the requirement. We also do a final random inspection just like a third party audit supervised by our Quality Assurance Manager.
